## DETAILED ACTION

### *Election/Restriction*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-6, drawn to a method for identifying a compound that has the ability of modulating sister chromatid separation by inhibiting the proteolytic activity of separase, classified in class 435, subclass 7.1.
  - II. Claim 7-9, drawn to a peptide and a pharmaceutical composition comprising a peptide, classified in class 514, subclass 2.
  - III. Claim 10, drawn to an inhibitor of separase, classified in class 530, subclass 300.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions of Groups II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). Each of the products of Groups II and III are independent chemical entities and require different literature searches.

The invention of Group III is unrelated to the processes of Group I. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). The processes of Groups I do not require the product of Group III.

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process for using the product as claimed can be practiced with another materially different product such as using SCC1 as the substrate.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
